

INTRODUCTION TO RHONE HIGH VALUE ASSET SERVICES

HIGH VALUE ASSETS

Yachts, aircraft, artworks, classic cars and certain other premium assets are aspirational, they are the goals that people strive for and the realisation of their dreams. But they are also financial assets that have potentially huge legal and fiscal implications. Careful structuring and ongoing management is necessary to acquire, protect and preserve these unique assets and to allow them to be used and enjoyed to the full.

Rhone High Value Asset Services has the experience and expertise to create and administer tailor-made solutions that maximise the enjoyment of these assets whilst also optimising the investment in them.

FAMILY ASSET OFFICE

Rhone High Value Asset Services provides a family office service for these assets, guiding and assisting clients with any and all aspects of ownership and operation. For existing owners this can start with an audit of their ownership structure and the tax status of the asset and the services that they currently receive and for clients buying or wishing to build we ensure that they ask the right questions and understand the advice that they receive from suitable experts and furthermore fully understand the nature and implications of ownership. We then bring together a team of professional specialist service providers to cover all aspects of the purchase, design, build and operation of the asset whilst also providing oversight, cost control and audit.

WHY HIGH VALUE ASSETS SHOULD BE STRUCTURED

- To separate the beneficial owner from the asset and reduce personal liability
- To provide management and oversight of costs
- To ensure operational efficiency
- To protect the asset and ensure that the eventual disposal or transfer to the next generation is carried out effectively and efficiently

YACHT AND AIRCRAFT SERVICES

- Guidance on the acquisition or build of a yacht or aircraft and eventual disposal
- Formation and administration of ownership structures
